EDUCATION

California State Polytechnic University Pomona, Pomona, CA

May 2026

Bachelor of Business Administration – Computer Information Systems – GPA: 3.70

EXPERIENCE

ThermoFisher Scientific – Security Operations Center Analyst Contractor

March 2026 – Present

- Triaged and remediated 100+ CrowdStrike endpoint detections, involving PUPs, suspicious PowerShell execution, executables, USB trojans, and persistent activity; optimizing event logging workflows, reducing SOC alert noise by 90%
- Investigated 65+ AWS GuardDuty detections relating to suspicious IAM activity, outbound C2 traffic, anomalous API calls, and suspicious network activity utilizing Splunk, Wiz, and VMs; enhancing cloud security visibility by 80%
- Designed 4 PowerShell automations into a Slack Command channel, collaborating with multiple different teams, such as the integration, communication, and engineering teams, improving our SOC's endpoint investigation efficiency by 20%

ThermoFisher Scientific – Security Operations Center Analyst Intern

June 2025 – January 2026

- Monitored and triaged over 1600+ security detections of phishing, spam, security awareness training, and lost & stolen through a SOAR dashboard, utilizing tools like Proofpoint, ServiceNow, FortiGuard, CentralOps, VirusTotal, and Azure
- Created over 10+ detailed reports on ongoing incidents for international team handoff meetings
- Provided recommendations for process improvements, streamlining incident handling, detection, and response procedures

Private Label PC – Information Technology Support Intern

June 2023 – January 2024

- Aided IT asset lifecycle management through inventory management, resale of 35% of obsolete inventory, and purchasing
- Carried out daily backups of the Order Management System for all co-workers to ensure 100% availability of business-critical data if any incident were to occur

Gigabyte Technology (G.B.T Inc) – Information Technology Intern

June 2022 – August 2022

- Built, installed, and configured over 35+ machines and implemented different operating systems for new hires or projects
- Performed basic IT and network troubleshooting of over 100+ different work devices to an uptime of at least 95%

PROJECTS

Cybersecurity Homelab Environment

November 2024 – Present

- Built an Active Directory lab with DNS, DHCP, and a Windows Server domain controller across 5+ VMs to simulate an enterprise IT environment
- Configured 10+ users, groups, and shared resources to enforce access-control boundaries and least-privilege principles
- Practiced log review, endpoint troubleshooting, and detection workflows across Windows and Linux systems

Collegiate Penetration Testing Competition Bootcamp

July 2024 – August 2024

- Identified 5+ vulnerabilities on misconfigured systems using tools such as Nmap, Metasploit, Nikto, and Sqlmap
- Used Burp Suite Repeater to identify and exploit 3 SQL injection vulnerabilities on misconfigured web applications

Collegiate Cyber Defense Competition Bootcamp

July 2024 – August 2024

- Structured network settings on a Windows 10 machine using command prompt to connect to local hosted websites
- Implemented NAT on Cisco routers to allow for port forwarding to internal Windows systems

Telstra Cybersecurity Incident Response and Malware Mitigation Job Simulation

October 2024

- Assessed web-based intrusion detection alerts to identify Spring4Shell attacks on web applications
- Simulated a web application firewall using Python to detect patterns and anomalies and help mitigate vulnerabilities

EXTRACURRICULAR

SWIFT Red Vs Blue Cybersecurity Competition - Blue Team Member

December 2024 – March 2025

- Participated in 3+ log incident response simulations defending compromised live services against red team adversaries
- Worked in a team of 2 to define firewall policies, leading to 85% more uptime of critical services compared to other teams
- Monitored infrastructure security across 3 VM servers, including Windows 2019 Server, 2022 Server, and a Ubuntu Server

SKILLS

- **Certification:** Security+ (In progress), Google Cybersecurity Certification, Cybersecurity Foundations (NASBA)
- **Tools:** Java, Python, Microsoft Office Suite, Virtual Machines, PowerShell, Linux, Splunk, CrowdStrike, Azure, Wiz, Jira
- **Cybersecurity Knowledge:** CIA Triad, NIST framework, MITRE ATT&CK framework, SOC2, ISO, PCI,
